

I am writing to implore my legislators to pass this bill, HB5146. Letting perfectly good food go to waste is a terrible shame when there are so many people in our state who are food insecure. There are far too many hungry children and adults who need our attention!

Please pass this law to mandate that grocery stores donate rather than trash their foods that have passed their "best if used by..." dates. This food is not trash! It can be a meal for someone who would otherwise go without!
